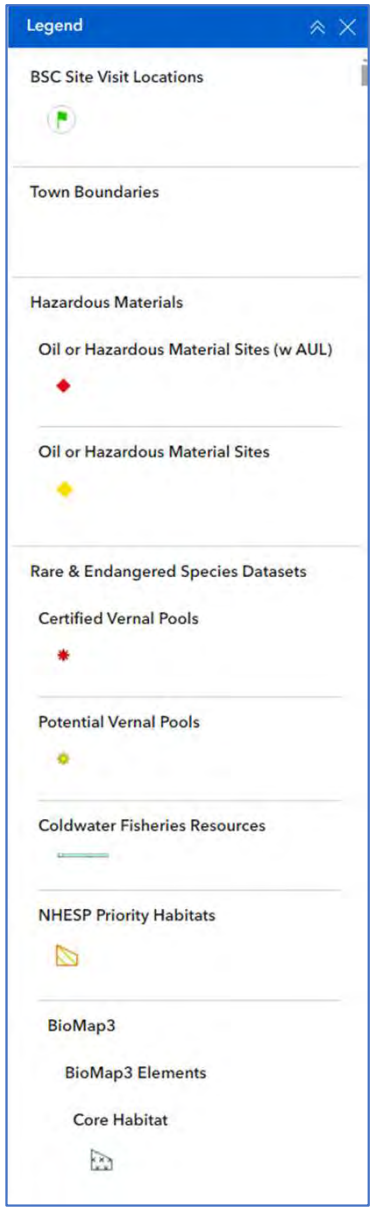
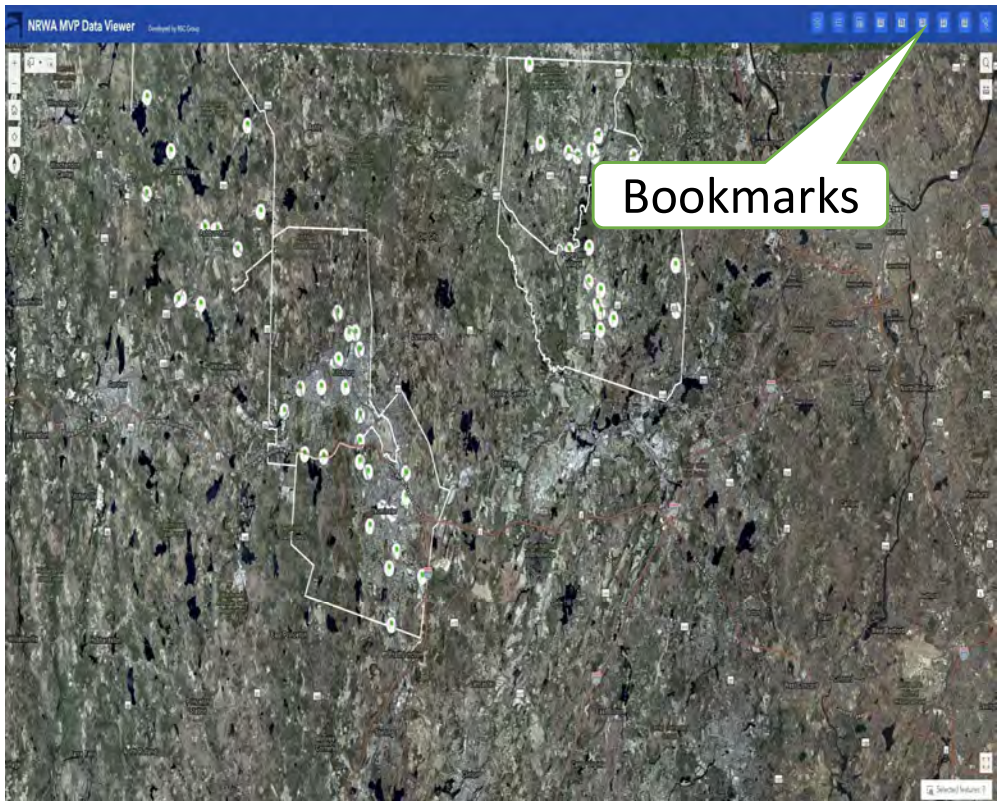
NRWA Natural Climate Solutions Data Viewer Legend (access via NRWA ArcGIS website: Data Viewer | NRWA Towns)





To visit each site more quickly:
Use the bookmarks per the site names. This will bring you to the location and turn on an applicable set of analysis layers.

Notes for using these maps.

- These recommendations come from community and professional assessment and represent a practical balance of elements identified as feasible and valuable in the accompanying Nature-based Solutions (NbS) Opportunities Matrix that could be combined at the location as a community action project.
- This is a tool for discussing the selected sites and the areas that influence them. Use the data viewer link to explore each in greater detail/ wider context.
- Recommendations listed on the map excerpts are numbered for location identification and include a sub-set of location specific actions numbered per the accompanying NbS Opportunity Matrix. These exclude endemic or regional changes which can't be singularly mapped.
- Other systemic actions that are not location dependent or span multiple micro locations may still be essential to an overall action project. Review the NbS Opportunity Matrix to develop a project program combining these.
- The following maps and lists identify suites of improvement projects for key locations of either high environmental risk or high environmental value or both and are intended to support funding and design of built/ planted improvements.
- There are also town-wide actions that can build resilience through cooling of air and water, stormwater purification and groundwater recharge, support of diverse wildlife as described in the NbS Opportunity Matrix.
- From these starting points resilient design and management is meant to become the standard for both public and private land use throughout the community.

The goal of this section of the report is to locate sites for potential Nature-based Solutions. As you examine the sites think of what opportunities for improvement could be applied that affect local and regional ecological outcomes.

Categories of NbS approaches to consider:

- Ecosystem restoration approaches
- Ecological restoration
- Ecological engineering
- Landscape restoration

Issue-specific ecosystem-related approaches

- Ecosystem-based adaptation
- Ecosystem-based mitigation
- Climate adaptation services
- Ecosystem-based disaster risk reduction

Infrastructure-related approaches

- Natural infrastructure
- Green infrastructure
- Supportive grey infrastructure

Ecosystem-based management approaches

- Integrated water resources management

Ecosystem protection approaches

- Area-based conservation approaches, including protected area management

The following are a list of Nature-based Solution types (NbS) that may be applicable to the locations, or parts there of, identified in the public outreach and analysis.
For a comparison of value and feasibility see the NbS Opportunities Matrix.
For detailed descriptions of these project types see the NbS projects section of the report.

Natural Environment Restructuring and Management
River/ pond bank revegetation (creation of slopes features and preferred vegetation)
Grassland/meadow management restoration (introduction and maintenance practices)
Forest-shrubland heath management restoration (species additions and removals)
Wetland management restoration (erosion control, micro-damming and connectivity)
Hedge row pollinator strip (buffering open areas with high value trees or forbes)
New wetland or floodplain construction/ expansion (micro-damming and channeling)
Pond creation/ alteration (creation expansion or shaping of ponds)
River flow alteration (adding sinuosity, erosion control, planting and aeration features)

Built Environment Restructuring, Best Management Practice (BMP)
Stormwater treatment wetlands (temporary impoundment and treatment of storm water)
Upstream BMPs (rain garden, bio-swale, vegetated buffer, swale, etc.)
Shade-habitat/ infiltration tree plantings (canopy shade trees over lawn and pavement)
MSCS culvert improvement (higher wider culverts with passable banks and channel)
Dam weir smart controls (channel modifications for gradual passage of water)
Pervious parking walking areas (stabilized pervious access and activity surfaces)
Algae/ aquatic invasive species treatment (chemical, cultural, mechanical solutions)
Species crossing protections (signage, light, fences, audible surfacing)
Beaver deceiver/ promoter (structures to prevent flood damage or improve floodplain)

Ecological Awareness & Access Projects
Educational interpretation (signage, events, digital media, arts and other ecological info)
Furnishings/ gathering space (public gathering spaces for environmental appreciation)
Soft trail (stabilized natural surface and terrain trails)
Paved trail (durable universal access surface trails or other access)

Related Regulatory Actions
Conservation purchase/ restriction (conservation trust, direct purchase)
Public - private partnership (sponsored managed private plantings)
Land swap/ land bank (development rights transfer use deferral)
Zoning overlay/ other regulations (development limits, activity limits)
Resilient redevelopment incentive (loans, grants, technical support, regulatory support)

Architectural Enhancement Projects
Green architectural enhancements (green wall, green roof, white roof, water harvesting, etc.)
Green energy features (solar, wind, hydroelectric, geo/hydrothermal)

Value Added Features on Projects
Invasive species management (identification, removal and replacement of harmful species)
Species monitoring protocol (staffing and technical support for inventory and monitoring)
Habitat enhancements (nesting foraging and hunting features)

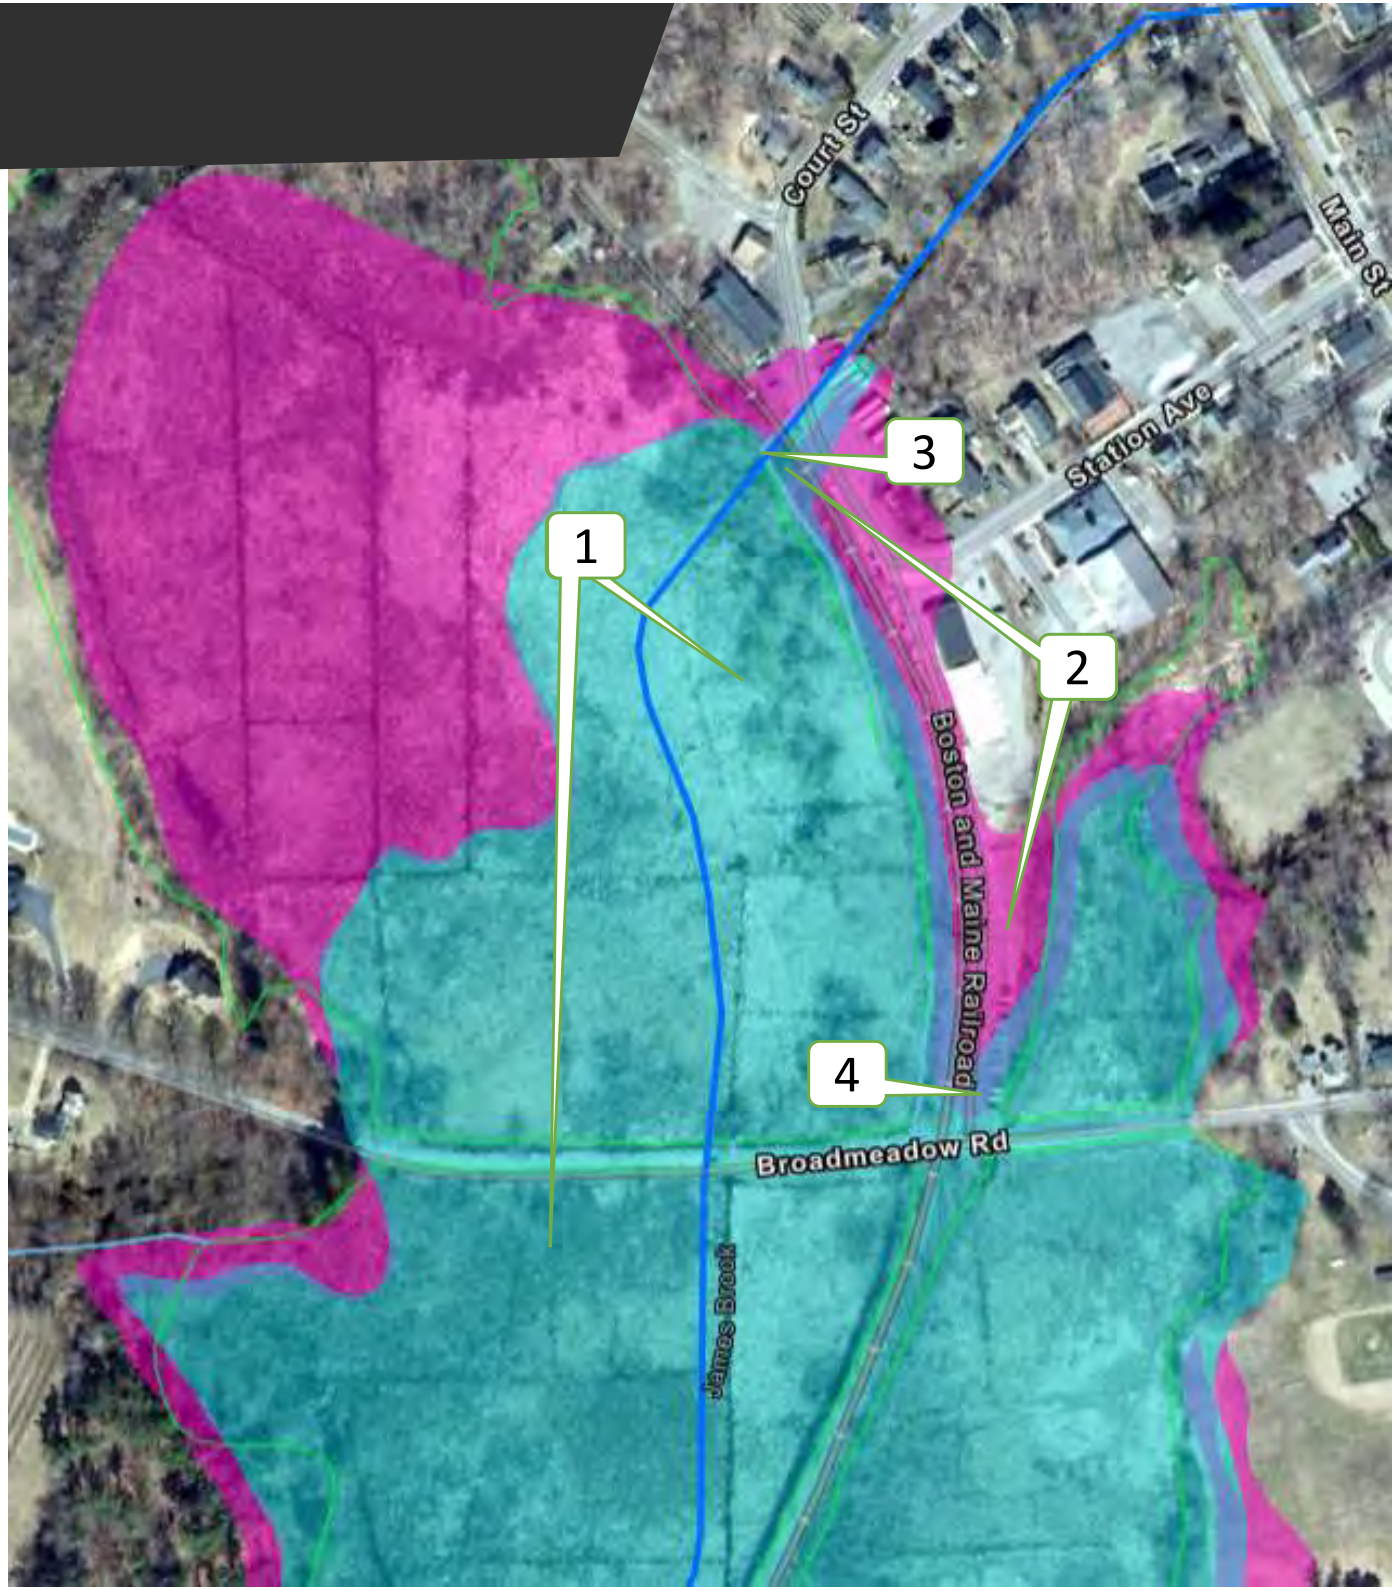
GROTON, MA

Broad Meadow

Map Link

https://arcg.is/zKvGi1

1. Wetland Meadow
    - #4 Wetland management restoration
2. Trail Parking Area
    - #11 Stormwater treatment wetlands
    - #2 Grassland meadow management restoration
    - #14 Shade-habitat/infiltration tree plantings
    - #60 Habitat enhancements
3. James Brook Across Broadmeadow
    - #13 Upstream BMPs rain-garden, bio-swale, etc.
    - #15 MSCS culvert improvement
    - #58 Invasive species management
4. Main Entrance to Broad Meadow
    - #24 Outdoor classroom and nature play
    - #30 Pedestrian safety and bike access

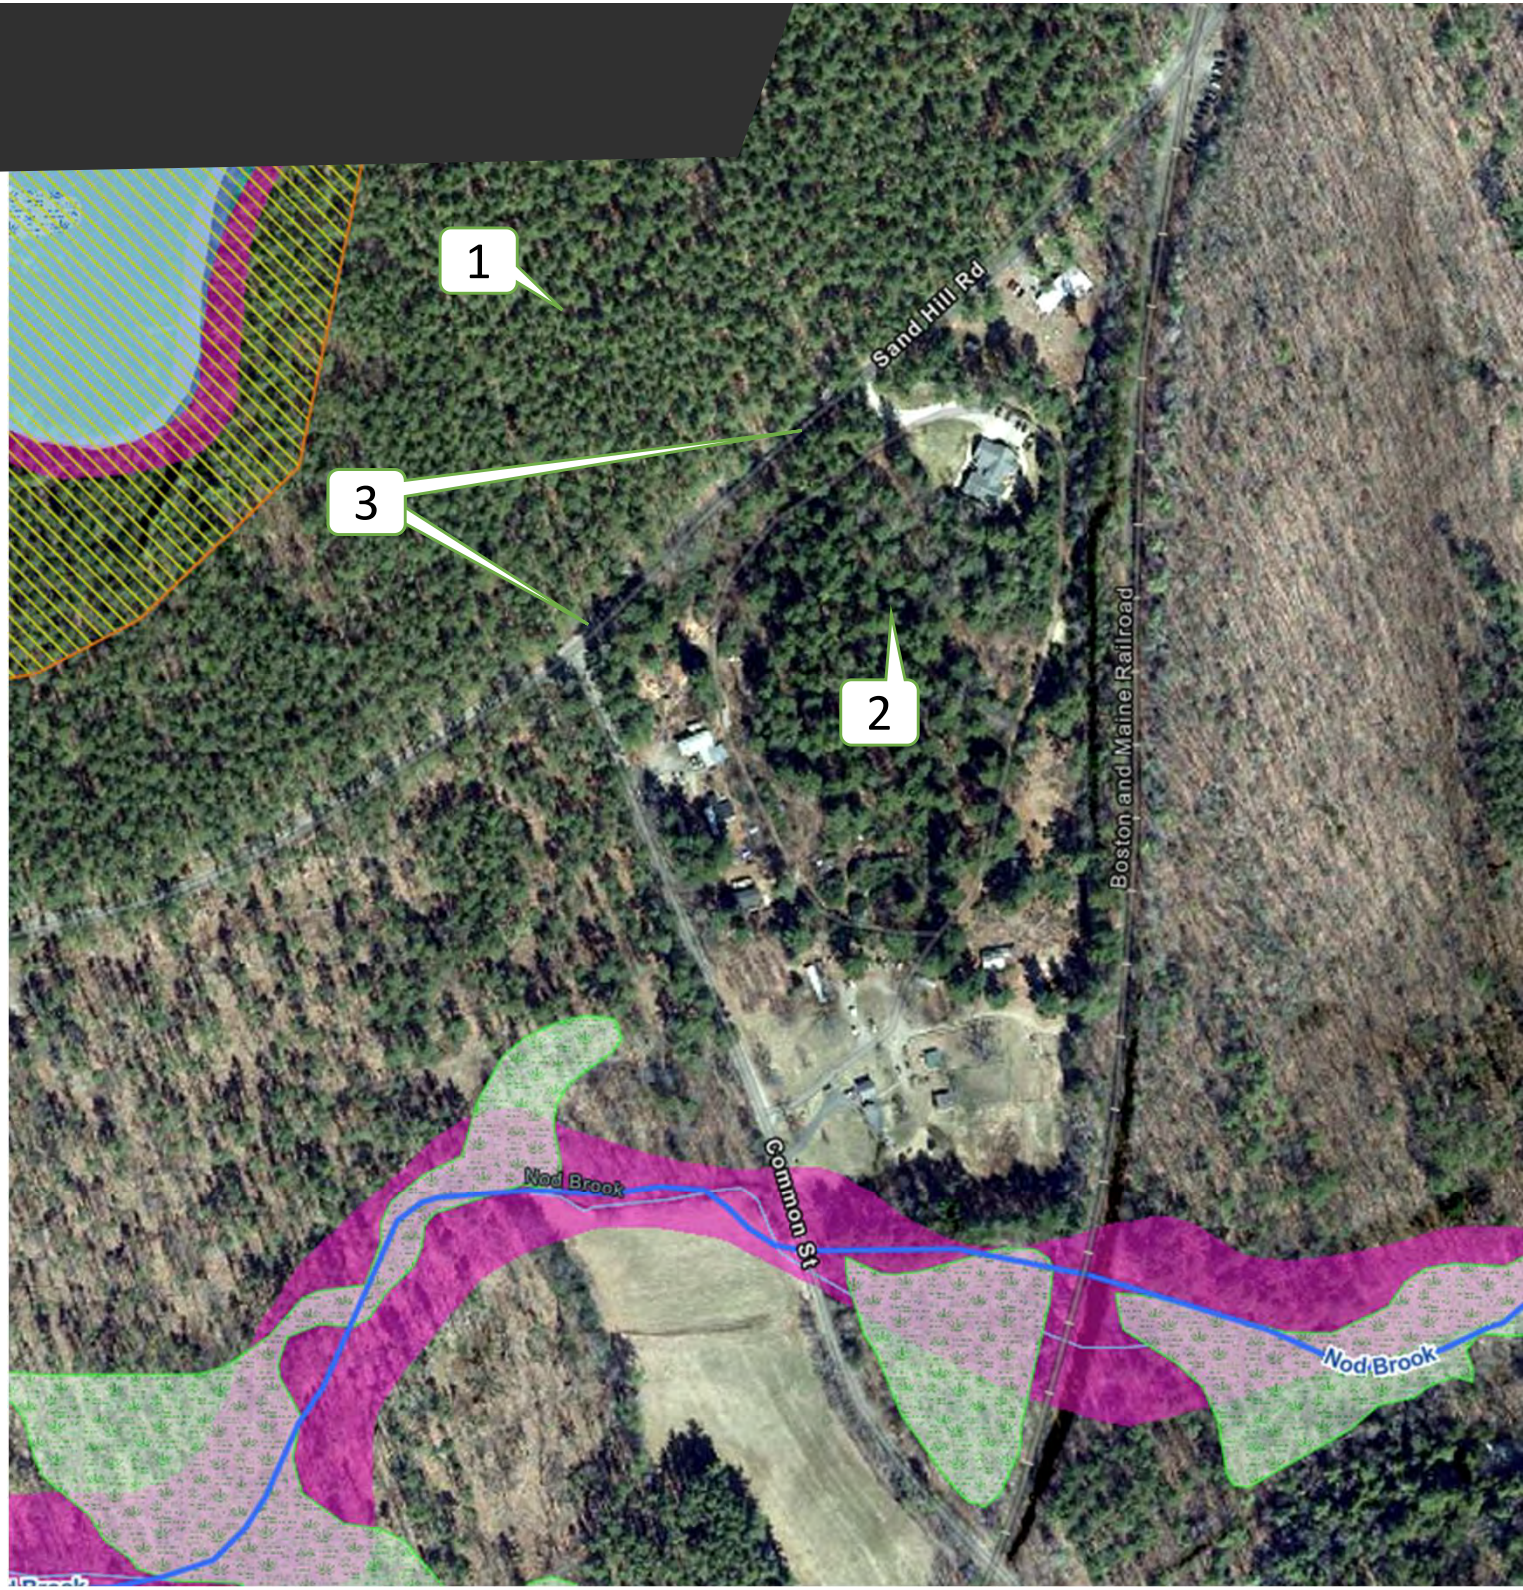


Nod Road

Map Link

https://arcg.is/0vLGLe

1. J. Harry Rich State Forest
    - #5 New wetland or floodplain construction/expansion
    - #11 Stormwater treatment wetlands
    - #20 Species crossing protections
2. Forest around the Old Race Track
    - #58 Invasive species management
    - #26 Apply indigenous knowledge
3. Sand Hill Road
    - #15 MSCS culvert improvement



Groton Country Club

Map Link

https://arcg.is/1aH4zb0

1. Groton Country Club Parking Lot and Building
    - #23 PV parking awnings and rooftops
2. Lovers Lane
    - #13 Upstream BMPs rain-garden, bio-swale, etc.
    - #11 Stormwater treatment wetlands
3. Lawn at Top of Parking Lot
    - #8 Pollinator hedgerow buffer
    - #17 Pervious walking areas
    - #2 Grassland meadow management restoration
    - #3 Forest shrubland heath management or restoration

James Brook

Map Link

https://arcg.is/1arOa4

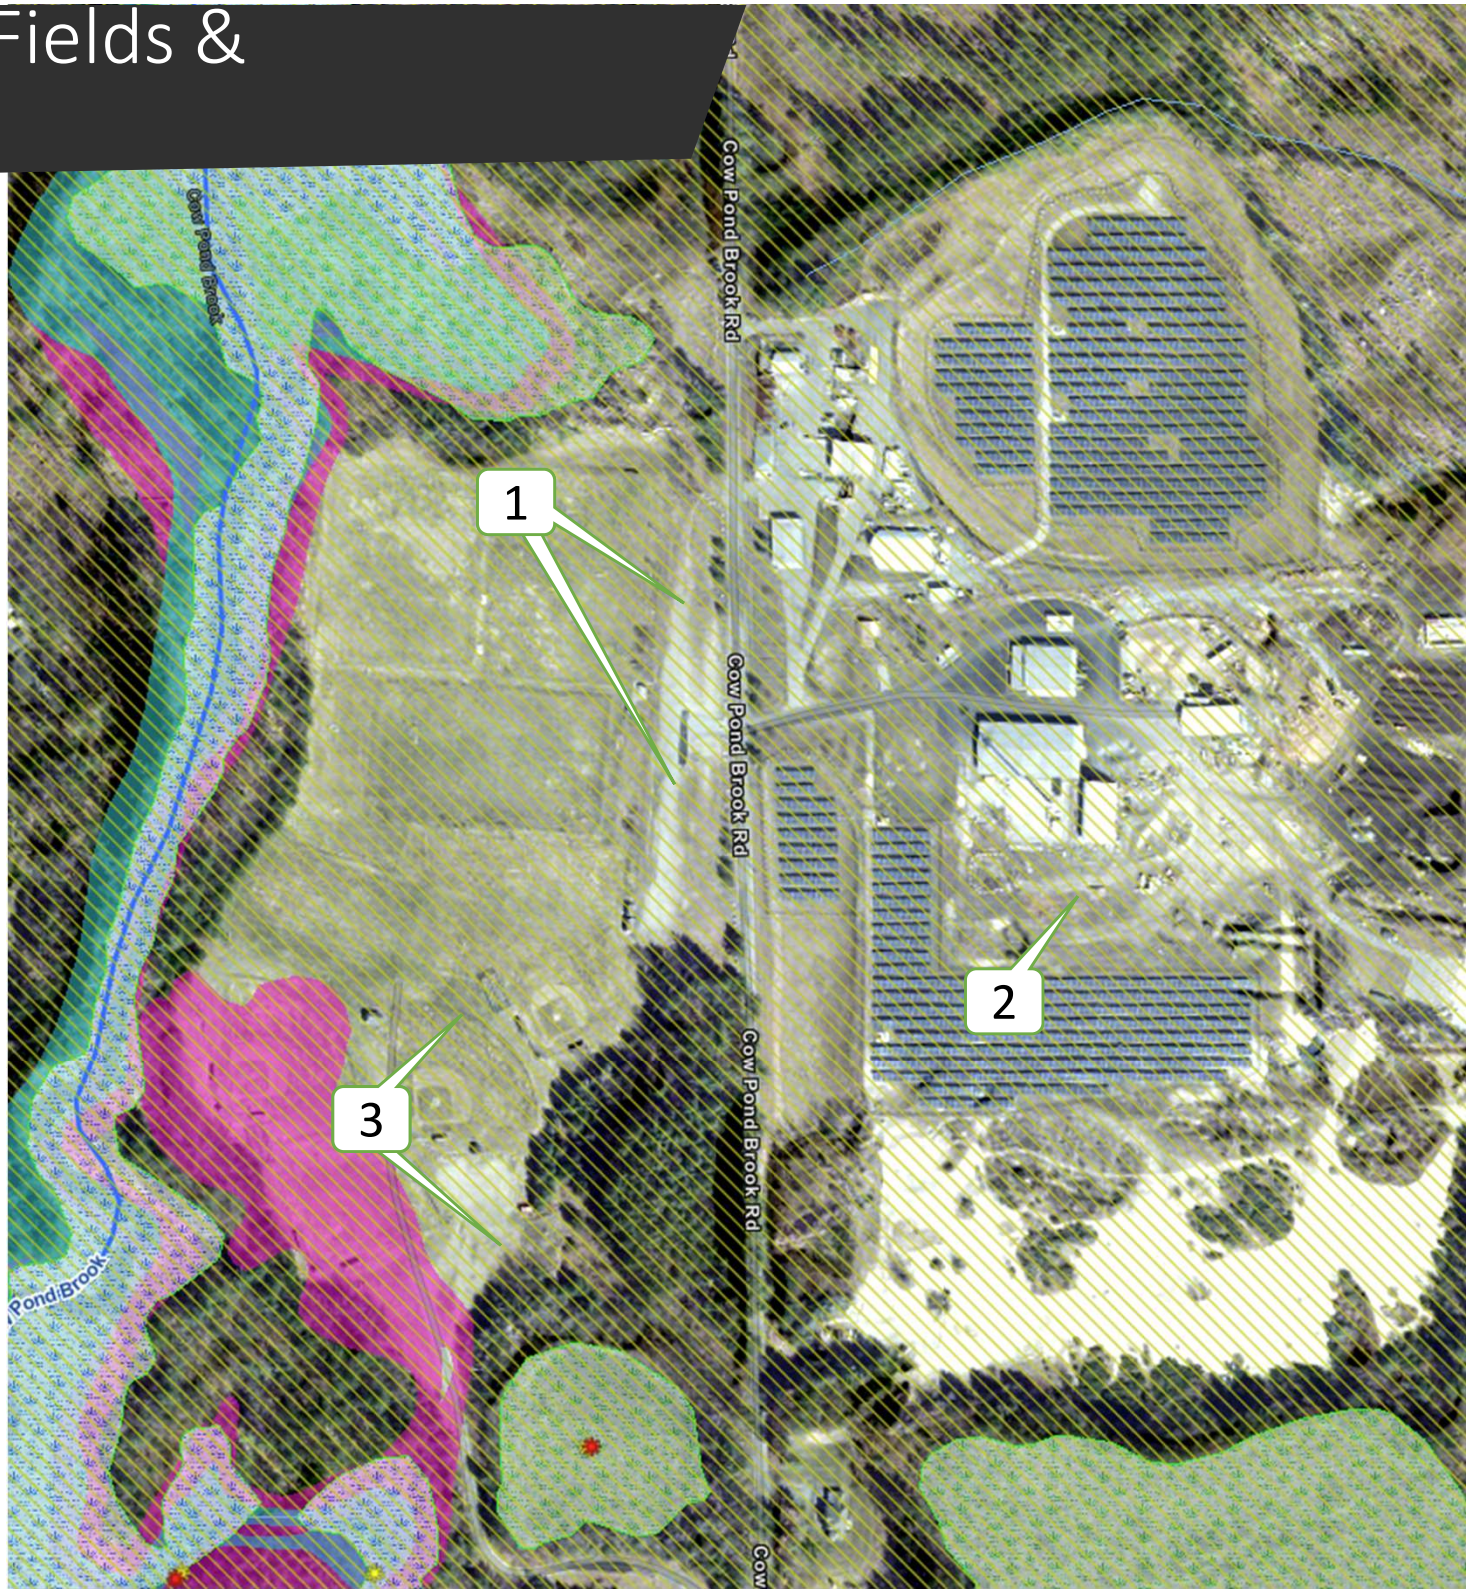
1. Wetland along Old Ayer Road
    - #8 Pollinator Hedgerow Buffer
    - #58 Invasive species management
    - #26 Apply indigenous knowledge
2. James Brook
    - #7 Stream flow alteration
    - #5 New wetland or floodplain construction/expansion
    - #60 Habitat Enhancements
3. Parking and Wetland downstream of James Brook
    - #50 Analysis and study projects
    - #3 Forest/shrubland health management or restoration
    - #13 Upstream BMPs rain-garden, bio-swale, etc.

Cow Pond/Playing Fields & Highway Dept.

Map Link

https://arcg.is/XPGiH0

1. Parking Lot for Playing Fields and Access Road
    - #14 Shade-habitat/infiltration tree planting
    - #8 Pollinator hedgerow buffer
    - #30 Pedestrian safety and bike access
    - #36 Shade requirement
2. Highway Department
    - #58 Invasive species management
    - #26 Apply indigenous knowledge
    - #59 Species monitoring protocol
    - #60 Habitat enhancements
3. Baseball Fields
    - #19 Lighting modifications/upgrades
    - #20 Species crossing protection
    - #49 Nature-based recreational opportunities



Middle School Parking

Map Link

https://arcg.is/18Tr0C1

1. Groton Middle School Forest
   - #24 Outdoor classroom/nature-play
   - #27 Soft trail
   - #29 Soil protection-puncheon-boardwalk
2. Edge of the Baseball Field
   - #58 Invasive species management
3. Edge of Baseball Field
   - #14 Shade-habitat/ Infiltration Tree Plantings
   - #25 Food production and forage
   - #8 Pollinator hedgerow buffer
4. Groton Middle School Rooftop and Parking Lot
   - #11 Stormwater treatment wetlands
   - #17 Pervious parking and walking areas
